

Cancellation of target 20 for Compound

Today, the second day of qualification, the mistake in measurement of distances was discovered. One target on the compound course was too short and the appeal was lodged. The Jury of Appeal decided to do a remeasurement; it showed 6 cm out of allowed tolerance. The Jury of appeal decided to take target 20, blue course, out of the competition and adjust all scores (all compound archers) accordingly (art. 31.1.3)

We feel very sorry for it. It was checked at least twice before start of the day by organizers and judges but sometimes things happens at the wrong time. This time it seems that the black buttress and target face give different signal for the range finders. We hope you excuse us and we will try to make it not happen again, here or in other competitions.
