

Notice on Team finals

1. All archers are going to shoot teams. And therefore Longbow and Traditional are merged to form 2 teams of 2 people.
2. The Team Manager shall give notice on switch of maximum one member of a team, at the end of the qualification for that archer. After this deadline teams will be made according to WAN rules, and changes will no longer be accepted.

And therefore:

3. Due to archers leaving for the European Championships Sunday, archers that have given notice on not being able to shoot teams, are removed from the teams' competition at NUM 2024, and their score does therefore not affect the seeding of teams at NUM, and the allowed switch.

At present there are 1 Swedish and 10 Danish archers that have given notice on not shooting teams at NUM.

The decision is made since the Team Managers only are allowed one change in their team set up for the team finals.

This means, that the teams will be seeded for the team finals according to the participants, who have not given notice of travelling to European Championships.

Example: A has 720 points and has given notice, and will not participate in the teams at NUM, B has 719 points, C has 718 points, D has 717 points, and E has 700 points.

The team will consist of B, C and D, with a seeding score of $719+718+717=2154$. E will be on the next team of that nation or on a Nordic team.

This leaves the Team Manager with one allowed change, eg. E taking C's spot on the team, without it changing the seeding score.
