How to use Scorekeeper NG- 3D&Field

				All the archers on your butt should be listed. Select the first archer to enter their scores.	Enter the arrow values for the archer.	When you have entered the last value, the App will return to the main screen.	Now do the same for every archer.	If you want to correct an arrow value, tap the archer to correct the arrow.
				*Sometimes, as with any technology, problems occur.* *If you are having issues with the tablet not responding, call a judge—they will call the results team. Ask the judge how to carry on until the tablet issue is resolved.*
Highlight the arrow value you want to correct, and select the correct value.	When you're done, tap the Back button to return to the main screen.	You can view the scorecards at any time by pressing the scorecard icon at top-right corner.	When you're done, press the Back icon in the top-left corner.
