NEW INDOOR TARGET LIGHTS

At this year's National Indoor Championships a new lighting system will be used. We have tested this system at last year's Back2Back finals. Since then, we have worked hard to be able to bring this system to the whole event, so everybody competing will get to experience it. The new system has been designed and manufactured by Robert Pinder in collaboration with Archery GB Competitions Team.

The new system utilizes the use of LED strip lights, supplying the target with a much brighter and even light distribution, leaving minimal shadows. The light operates from above target, removing the hazard of kicks and trips that cause delays and potential accidents.

This improvement will upgrade the experience for the archer, supplying more efficient, enjoyable shooting conditions.
